Comfort-First Gentle pacing

Stress-Free Fun, warm visits

Children's Dental Care
Preventative, restorative, and growth-focused therapies structured solely for toddlers through teenagers.

Focus on Patient Comfort
Painless numbing techniques, interactive explanation routines, and calm pacing remove medical fear.

Oral-Hygiene Education
Empowering families with dietary counseling, ergonomic brushing demonstrations, and daily motivation.

Care for Growing Smiles
Close surveillance of dental transition from primary baby teeth to lifelong permanent dentition.

SPECIALIZED PEDODONTICS
Care for Every Stage of Growing Smiles

Medically grounded, painless pediatric dental treatments delivered in an encouraging, cheerful setting.

Children's Dental Checkups
Comprehensive evaluation of baby teeth eruption, bite alignment, oral soft tissues, and early signs of demineralization.

Routine Exam & Charting

Preventive Dental Care
Protective fluoride varnish applications and micro-thin pit & fissure sealants to shield developing grooves from deep decay.

Fluoride & Sealants

Cavity Assessment & Treatment
Gentle, micro-invasive decay removal paired with biocompatible, tooth-colored composite restorations preserving natural anatomy.

Biocompatible Fillings

Oral Hygiene Guidance
Child-friendly instructions using oversized models to cultivate enjoyable, correct two-minute brushing routines.

Brushing Mastery

Guidance for Developing Teeth
Early detection of crowding, crossbites, and space maintainer application to prepare adequate room for incoming adult teeth.

Growth Interception

Parent & Child Consultations
Dedicated conversations on thumb-sucking, bottle decay prevention, teething remedies, and balanced enamel-friendly snacks.

Family Guidance

Age Focus: 0–18 Years

Dr. Samiksha Kapse Banarase
Consultant Pediatric Dentist | B.D.S., M.D.S.

"Gentle & Painless Kid Dental Care — nurturing confident, happy smiles in an environment designed to feel safe, welcoming, and fundamentally positive."

With focused master's qualifications in pediatric dentistry, Dr. Samiksha tailors every procedure to children's emotional developmental benchmarks. She ensures each appointment reinforces trust and healthy childhood dental perceptions, rather than anxiety.

- Preventive Fluoride Therapy
- Early Bite Alignment
- Specialized Child Psychology

AT-HOME PREVENTIVE KNOWLEDGE
Building Healthy Dental Habits Starts Early

Simple daily practices recommended by our pedodontic team to maintain bright, decay-resistant young teeth.

Everyday Brushing & Flossing
Brush twice a day for two full minutes with a grain-sized fluoride paste for toddlers, increasing to pea-sized after age 3. Supervise until hand dexterity matures around age 7.

- Soft-bristled head sized for mouth
- Gentle circular motions on gumlines

Nutrition for Strong Teeth
Frequent snacking on fermentable carbohydrates feeds acid-producing bacteria. Prioritize calcium-rich dairy, crisp vegetables, fresh fruits, and fresh water between meals.

- Limit sticky dried fruits & juices
- Rinse mouth with water after meals

Preparing for a Fun Visit
Frame dental checkups as an exciting adventure. Avoid words like "pain", "needle", or "drill." Let them know Dr. Samiksha counts and shines up their teeth with gentle tools.

- Read children's storybooks on dentists
- Schedule during well-rested morning hours

STRESS-FREE PROTOCOL
What to Expect During Your Visit

01 Schedule a Visit
Choose a relaxed morning or afternoon time that suits your child's rhythm. We prepare individualized welcome notes.

02 Meet the Dentist
A playful, gentle introductory tour where Dr. Samiksha demonstrates the dental mirror and gentle water washer in a relaxed dialogue.

03 Discuss Care Together
We review current oral development, share age-matched hygiene tips, and draft a clear, relaxed prevention roadmap.

IDA Registered Practitioner

THE SAMARTH STANDARD

Professional Care, Clear Guidance

We respect your comfort and time. Every treatment recommendation is underpinned by medical rationale and your informed consent.

01
Individualized Discussions
Unrushed one-on-one evaluations where your symptoms, lifestyle, and dental history shape the procedural roadmap.

02
Clear Explanations
Complete transparency across treatment modalities, expected timelines, recovery parameters, and procedural costs.

03
Long-Term Health Focus
We avoid unnecessary extractions. Our primary philosophy remains the biological preservation of your living dentition.

04
Professional Consultations
Direct clinical guidance delivered by specialist M.D.S. practitioners using high-precision digital radiography.

SEAMLESS EXPERIENCE

Your Care Journey in 3 Reassuring Steps

1
Book a Consultation
Select a convenient morning or evening time slot online or with a quick call to our Arjun Nagar reception.

2
Discuss Dental Concerns
Review your digital intraoral scans with Dr. Tejas Banarase and outline targeted solutions tailored to your condition.

3
Plan Your Treatment
Receive pain-relieving therapy or precision restorations under gentle local anesthesia with
zero unexpected surprises.
